

HONDURAS

NEW SPECIAL REGULATIONS FOR THE APPLICATION AND COMPLIANCE OF MINIMUM RATES IN PUBLIC FREIGHT TRANSPORTATION

Through Executive Agreement number IHTT-002-2019, published in the Honduran Official Newspaper “La Gaceta” on March 1st, 2019, the Honduran Institute of Land Transportation issued its Special Regulations for the Application and Compliance with the Minimum Rates in Public Freight Land Transportation in Honduras.

This Regulation complements the minimum rates established for the provision of public freight transportation service in Honduras. A default situation regarding the payment of minimum rates under this Regulation by the user or intermediary in contracting the freight transportation is sanctioned with a fine of 4 minimum wages corresponding to each contracted freight in default. In order to ensure compliance with the minimum rates under this Regulation, the Honduran Institute of Land Transportation will be conducting patrols, surveillance, control and supervision operations, in the country’s road network or in the company’s own facilities.

With the new Special Regulation for the Application and Compliance of the Minimum Rates in Public Freight Transportation of Honduras, the Honduran Institute of Land Transportation seeks new conditions that guarantee the contracting parties an adequate provision thereof in exchange for a fair remuneration.
